

Ninja Master Prep QB900B button replacement

If your button is stuck or is not working properly, this guide will help you find and solve the problem.

Written By: Kamal Taha

INTRODUCTION

This guide will teach you how to replace the spring in the button of your blender.

TOOLS:

- [Phillips #2 Screwdriver](#) (1)
 - [Soap + Water](#) (1)
 - [clean rags, about A4 size](#) (1)
-

Step 1 — The Ninja Master Prep QB900B

- Place the blender to the side.

Step 2

- Remove the two highlighted screws with a Phillips #2 Screw Driver
- Gently pull off the top.

Step 3 — Ninja Master Prep QB900B button replacement

- Remove the highlighted screws.

Step 4

- Pull out the highlighted spring.
- Now wash the button with soap and water, and follow the guide backwards to reassemble.

To reassemble your device, follow these instructions in reverse order.
